The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/540,044	Applicant(s) ESPINASSE, PHILIPPE	
	Examiner Frederick L. Lagman	Art Unit 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1, line 23, the recitation of "space between them" is unclear. It is not readily understood as to what "them" refers to. "Them" should be replaced by what "them" actually refers to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 3, 4, 6, 7, 8, 10, 11, 12, 13, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Vigander #4,188,157. Vigander discloses an underwater storage installation comprising a base 1, at least one storage cell 2, at least one support column 3, a platform 4 and cryogenic supply and discharge pipes (not shown). The storage cell comprising an outer enclosure 13 made of concrete, a vapor barrier 23, a cryogenic liquid storage tank 11 which can be made of metal such as

stainless steel, and thermal insulation 12 carried in a second space. A drainage elements are provided for draining off water (see col. 6, lines 10-15). Furthermore, it is well known to provide transfer apparatus including a jib to allow transferring of liquids to an tanker/vessel.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vigander '157 in view of Cook #4,402,632. Vigander discloses all that is claimed except for the insulation comprising perlite or glass wool. Cook discloses the use of perlite 46 for insulation for LNG storage, see col. 3, line 65. It would have been obvious to one of ordinary skill in the art to provide perlite as insulation, since Cook teaches that perlite is suitable for accommodating the severe thermal gradient present when liquefied material is stored.

Allowable Subject Matter

7. Claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
